

This map shows areas involved in East Kildonan's vast new residential and industrial expansion program. Slated for the residential area are 800 homes costing \$8,000,000 for which preliminary work on sewer and water mains is to begin immediately. The plan, resulting from a deal closed between the British American Land Development Co. Ltd., and the municipality, calls for a shopping centre on Watt street, which will be paved to a 32-foot width for buses. Opened for industrial expansion will be 400 acres of land.
